

JACE-NXS Minimum Niagara^{AX} / Niagara R2 Requirements

The JACE-NXS requires the following minimum NiagaraAX / Niagara R2 build levels:

NiagaraAX

If shipped as a Niagara^{AX} unit, install NiagaraAX 3.1 (build 3.1.29) or higher. Please note that NiagaraAX 3.0 is not supported in a JACE-NXS. See the document *JACE-NXS Niagara^{AX} Install & Startup Guide* for more details.

Niagara R2

If shipped as a Niagara R2 unit, install Niagara r2.3.5xx. Please note that r2.301.517 or higher is required for Niagara sysmon (system monitor) support. Also note that Niagara r2.3.4 or r2.3.3 is not supported in a JACE-NXS.
